

BUSINESS RULES CATALOG

The One – Seamless FM Platform · Living document · v1.0 · 2026-08-07

This is a **single living document for the whole platform**, not a per-feature file. Never copy it. PRDs reference rule IDs; they do not restate rule text. Built per the structure of `02-BUSINESS-RULES-CATALOG.md`; rules are drawn from `product/wo-lifecycle.md` (v3), `product/quotes-payments.md`, the obligation rulebook (`Inbox Monitor/ESCALATION-BOT.md` lineage), and the completion-audit rules (Argus / Support Automation lineage).

1. What a business rule is

A business rule is a statement of policy that is **true regardless of any feature, screen or system**. It would still be true if you ran the business on paper. Policy lives here; implementation lives in a PRD or a ticket.

2. How to write one

Atomic (one rule, one statement) · **Declarative** (*must, must not, is calculated as, is defined as*) · **Testable** (pass/fail without a follow-up question) · **Free of implementation** (no tables, screens, buttons) · **Owned** (a named business owner, never a team or a developer).

Quality check before adding: atomic ☐ declarative ☐ testable ☐ unambiguous ☐ owned ☐ non-duplicative ☐.

3. Rule types

Type	Code	Purpose
Definition	DEF	Establishes what a term means
Constraint	CON	States what must or must not be permitted
Derivation	DRV	Defines a calculation
Action enabler	ACT	Triggers something when a condition is met
Routing	RTE	Determines who receives or decides something
Timing / SLA	SLA	Defines a time obligation
Access	ACC	Determines who may see or do what

4. Glossary

Term	Definition	Owner
Work order (WO)	An accepted, authorised unit of client work against a site, tracked from intake to collection	Operations
NTE	Not-To-Exceed – the client's pre-authorised spending ceiling for a work order	Operations

Term	Definition	Owner
FM company	The facilities-management company that manages the client's sites and issues work orders	Operations
Billing entity (Comp)	The Seamless company that bills the work (SFM, AF, BKR, TPM, RF, EDS)	Finance
Book	The set of work orders a dispatcher currently owns; every WO has exactly one home book	Operations
Pooled map	The shared, company-wide technician/vendor pool visible to all dispatchers	Operations
Technician	An external subcontractor (company or individual) sourced per job; never an employee	Operations
Assessment visit	The first site visit, to diagnose and gather quote inputs	Operations
Fulfilment visit	The visit that performs the approved work	Operations
Return trip	Any visit beyond the canonical two; an exception, not the norm	Operations
Soft close, part 1	Post-assessment completion: quote created, before-photos uploaded, checklist ticked	Operations
Soft close, final	Post-fulfilment completion: after-photos, remaining checks, technician payment initiated	Operations
TL Rep	The controlled push of curated updates from our system to the client's CMMS	Operations
Client-visible	Content explicitly classified as shareable with the client; everything else is internal	Operations
Quo	The SMS/voice channel with technicians (calls, transcripts, messages, photos)	Operations
Incurred	Work already performed before quoting (typically the assessment); context on a quote, never billed through it	Finance
Proposed option	One internally-drafted way to do the job, with narrative and priced line items	Operations
Business hours	Monday–Friday, 08:00–18:00, America/Chicago (CT)	Operations
Obligation	A tracked duty — something owed by someone, on a clock, derived from work-order state	Operations
Emergency WO	A work order in <code>emergency</code> status; its clocks run around the clock	Operations
SLA due date	The client-contractual completion deadline carried on a work order	Operations
CICO	The technician Check-In/Check-Out status on a work order	AR
BFI	Billed For Invoice — a WO flagged as billable without after-photos	AR
CO#	Closeout number issued at job completion; six digits when present	AR
Grey flag	The completion-audit hold: a finished WO not yet released for invoicing	AR
Release gate	The Admin Check + Quote Check confirmations that lift the grey flag	AR
Principal	Any actor — a person or a service account (bot/automation) — able to act in the system	Operations
Trust tier	Probation → standard → senior ladder within the dispatcher and AR roles	Operations

5. Rule anatomy

Every entry carries: **ID** (`BR-<MODULE>-<NNN>`, never reused) · **Statement** · **Type** · **Owner** · **Exceptions** (who may override, and what is recorded) · **On violation** (block / warn / flag) · **Effective from** · **Configurable** (fixed / per client / per contract). All rules below are effective from **2026-08-07** unless noted. Financial rules are versioned by date: a historical figure is always evaluated under the rule version in force when the event occurred.

6. The catalog

6.1 Identity, accountability & tiers – IAM

ID	Statement	Type	Owner	Exceptions	On violation	Configurable
BR-IAM-001	Every action in the system is performed by an identified principal; anonymous or unattributed changes must not occur	CON	Operations (J. Brown)	None	Block	Fixed
BR-IAM-002	Every change to a work order or its money is recorded in an append-only activity history – actor, timestamp, what changed – and history entries are immutable	CON	Operations (J. Brown)	None	Block	Fixed
BR-IAM-003	Automations and bots act as service-account principals held to the same attribution and permission standards as people	CON	Operations (J. Brown)	None	Block	Fixed
BR-IAM-004	The dispatcher (OM) and AR roles each carry a trust tier – probation, standard, senior – and gated actions may require a minimum tier	DEF	Operations (J. Brown)	–	–	Per role

6.2 Access & visibility – ACC

ID	Statement	Type	Owner	Exceptions	On violation	Configurable
BR-ACC-001	Every update, comment, photo and status note on a work order is classified internal or client-visible at the moment it is created; only client-visible content may reach any client-facing channel	ACC	Operations (J. Brown)	None	Block; log	Fixed
BR-ACC-002	The technician SMS/voice channel (Quo) is never client-facing; nothing from it may be forwarded to a client surface without being explicitly re-created as client-visible content	ACC	Operations (J. Brown)	None	Block	Fixed
BR-ACC-003	Internal costs, technician payment amounts, and margin must not be visible to clients or technicians	ACC	Finance	None	Hide	Fixed
BR-ACC-004	Creating or editing a quote requires the Senior OM tier or above	ACC	Operations (J. Brown)	None	Block (shown as a locked action)	Fixed
BR-ACC-005	Approving, sending, or rejecting a quote requires ATL authority or above (ATL, TL, AM, admin)	ACC	Operations (J. Brown)	None	Block (shown as a locked action)	Fixed
BR-ACC-006	Pushing content to a client's CMMS requires TL-level authority or the OA performing TL Rep; dispatchers must not push outbound	ACC	Operations (J. Brown)	None	Block	Fixed
BR-ACC-007	Executive guests hold read-only access to rollups and dashboards; they may not modify records	ACC	Operations (J. Brown)	None	Block	Fixed

6.3 Work orders & lifecycle — WRK

ID	Statement	Type	Owner	Exceptions	On violation	Configurable
BR-WRK-001	All work orders follow the single company-wide status pipeline; no team or book may define alternative statuses	CON	Operations (J. Brown)	None	Block	Fixed
BR-WRK-002	Every status belongs to exactly one status group — open, active, done, closed — and maps to exactly one lifecycle phase, or to none for the cancelled off-ramp (see Appendix A)	DEF	Operations (J. Brown)	—	—	Fixed
BR-WRK-003	A work order has exactly one home book at any time; assignment and routing are changes of home book and are recorded in the activity history	CON	Operations (J. Brown)	None	Block	Fixed
BR-WRK-004	A work order enters the operational pipeline only after an accept decision by a TL, ATL, or AM; a decline is recorded with the decider and a reason	CON	Operations (J. Brown)	None	Block	Fixed
BR-WRK-005	The canonical work-order shape is two visits — an assessment visit, then a fulfilment visit; any further visit is an exception recorded through the return-trip status	DEF	Operations (J. Brown)	Jobs approved up front proceed directly to fulfilment	—	Fixed
BR-WRK-006	Soft close part 1 is complete only when the quote exists and before-photos are on the work order	CON	Operations (J. Brown)	None	Flag	Fixed
BR-WRK-007	Soft close final is complete only when after-photos are on the work order (unless BFI), all checklist items are ticked, and the technician's payment request has been raised	CON	Operations (J. Brown)	BFI work orders per BR-REC-007	Flag	Fixed
BR-WRK-008	Cancelling or postponing a work order requires the actor and a reason to be recorded, and removes it from the lifecycle pipeline	CON	Operations (J. Brown)	None	Block	Fixed
BR-WRK-009	A work order approved on-site skips the client-approval wait; the on-site approval is recorded with who granted it and when	CON	Operations (J. Brown)	None	Flag	Fixed

6.4 Quotes — QUO

ID	Statement	Type	Owner	Exceptions	On violation	Configurable
BR-QUO-001	A work order carries at most one quote; changes after a rejection or after sending create a new revision, and all revisions are retained	CON	Operations (J. Brown)	None	Block	Fixed
BR-QUO-002	A quote separates incurred work from proposed options; incurred amounts are context and are never included in the quote total	CON	Finance	None	Block	Fixed
BR-QUO-003	The quote total is calculated as the sum of the proposed sections marked for inclusion in the client summary	DRV	Finance	—	—	Fixed

ID	Statement	Type	Owner	Exceptions	On violation	Configurable
BR-QUO-004	A line amount is calculated as quantity × rate, multiplied by 1.5 when the line is overtime	DRV	Finance	—	—	Fixed
BR-QUO-005	Sales tax on a quote is derived from the state of the work order's site	DRV	Finance	—	—	Per state
BR-QUO-006	Proposed options are internal alternatives; the client receives a single summary, never a menu of options	CON	Operations (J. Brown)	None	Block	Fixed
BR-QUO-007	A quote follows the states draft → pending approval → approved → sent; no state may be skipped	CON	Operations (J. Brown)	None	Block	Fixed
BR-QUO-008	A quote must be approved under BR-ACC-005 before it may be sent to a client	CON	Operations (J. Brown)	None	Block	Fixed
BR-QUO-009	A rejected quote returns to draft, and the reviewer's feedback is recorded on the work order	ACT	Operations (J. Brown)	—	—	Fixed
BR-QUO-010	A quote whose total exceeds the work order's NTE must be flagged to the builder and the approver before submission	ACT	Finance	Client grants an NTE increase, recorded on the WO	Warn (v1); blocking is a per-client setting	Per client

6.5 Money — FIN

ID	Statement	Type	Owner	Exceptions	On violation	Configurable
BR-FIN-001	The money position of a work order comprises: NTE, quote value, cost, invoiced amount, profit, and margin	DEF	Finance	—	—	Fixed
BR-FIN-002	Cost is defined as the total paid out to fulfil the work order — technician payments and company-paid parts/materials	DEF	Finance	—	—	Fixed
BR-FIN-003	Profit is calculated as invoiced amount minus cost	DRV	Finance	—	—	Fixed
BR-FIN-004	Margin is calculated as profit ÷ invoiced amount, expressed as a percentage	DRV	Finance	—	—	Fixed
BR-FIN-005	Derived financial figures are always computed from their source values and must not be manually overridden	CON	Finance	Recalculation of historical figures requires written Finance approval and an audit entry	Block	Fixed
BR-FIN-006	Any financial figure is evaluated under the rule version effective on the transaction date, never the current version	CON	Finance	Per BR-FIN-005 exception	Block	Fixed

6.6 Technician payments (AP) – PAY

ID	Statement	Type	Owner	Exceptions	On violation	Configurable
BR-PAY-001	A payment request must identify its payee — a registered vendor, or a named individual with contact details — plus amount, purpose, and payment method	CON	AP lead	None	Block	Fixed
BR-PAY-002	Any team member may raise a payment request; only AP may approve it, reject it, or mark it paid	RTE	AP lead	None	Block	Fixed
BR-PAY-003	A payment request follows the states requested → approved → paid, or requested → rejected; every decision is attributed	CON	AP lead	None	Block	Fixed
BR-PAY-004	The technician's payment request for a work order must be raised no later than final soft close	SLA	AP lead	None	Flag	Fixed
BR-PAY-005	When funds go to anyone other than the payee, the alternate recipient is explicitly recorded on the request	CON	AP lead	None	Block	Fixed

6.7 Obligations & time — OBL

ID	Statement	Type	Owner	Exceptions	On violation	Configurable
BR-OBL-001	Business-hour clocks run only during business hours (see Glossary) and pause outside them	DEF	Operations (J. Brown)	—	—	Fixed
BR-OBL-002	Obligations on emergency work orders run around the clock, without pause	CON	Operations (J. Brown)	None	—	Fixed
BR-OBL-003	An obligation's urgency tier is: ambient below 80% of its allowance, due-soon at 80% or more, breached past 100%, critical past 200% — and a breached emergency obligation is always critical	DEF	Operations (J. Brown)	—	—	Fixed
BR-OBL-004	An obligation resolves only on evidence that the owed action occurred; it must not be manually dismissable	CON	Operations (J. Brown)	None. There is no dismiss.	Block	Fixed
BR-OBL-005	An obligation may be snoozed only with a recorded reason, for at most 72 hours	CON	Operations (J. Brown)	None	Block	Fixed
BR-OBL-006	Each obligation notifies at most once per tier, ever	CON	Operations (J. Brown)	None	Block	Fixed
BR-OBL-007	An emergency work order must be acknowledged by a human within 2 hours of arrival, around the clock; breach is critical	SLA	Operations (J. Brown)	None	Critical obligation	Fixed
BR-OBL-008	A work order awaiting a quote must have its quote submitted within 2 business days	SLA	Operations (J. Brown)	Snooze per BR-OBL-005	Breached obligation on the dispatcher	Per client

ID	Statement	Type	Owner	Exceptions	On violation	Configurable
BR-OBL-009	A submitted quote must be reviewed – approved or rejected – within 4 business hours	SLA	Operations (J. Brown)	Snooze per BR-OBL-005	Breached obligation on the ATL	Fixed
BR-OBL-010	An approved work order must have its fulfilment visit scheduled within 2 business hours	SLA	Operations (J. Brown)	Snooze per BR-OBL-005	Breached obligation on the dispatcher	Fixed
BR-OBL-011	A quote awaiting client approval for 5 business days requires a recorded follow-up with the client, and again every 5 business days thereafter	SLA	Operations (J. Brown)	Snooze per BR-OBL-005	Breached obligation on the account owner	Per client
BR-OBL-012	A payment request must be decided – approved or rejected – within 2 business days of being raised	SLA	AP lead	Snooze per BR-OBL-005	Breached obligation on AP	Fixed
BR-OBL-013	A work order past its client SLA due date and not yet done carries a breached obligation until completion	SLA	Operations (J. Brown)	–	Breached obligation on the dispatcher	Per contract

6.8 Completion audit & receivables – REC

ID	Statement	Type	Owner	Exceptions	On violation	Configurable
BR-REC-001	Every finished work order passes the completion audit before it may be invoiced	CON	Head of AR	None	Block invoicing	Fixed
BR-REC-002	Audit release requires both the Admin Check and the Quote Check to be confirmed by an AR reviewer	CON	Head of AR	None	Block release	Fixed
BR-REC-003	The quote sent to the client must be recorded on the work order before audit; its absence is a major finding	CON	Head of AR	None	Major finding – blocks release	Fixed
BR-REC-004	The technician must be checked out (CICO = Checked-out) at audit; any other CICO state is a minor finding	CON	Head of AR	None	Minor finding	Fixed
BR-REC-005	A signed sign-off sheet must be on file for every audited work order; its absence is a major finding	CON	Head of AR	None	Major finding – blocks release	Fixed
BR-REC-006	Before-photos are required on every work order; their absence is a major finding	CON	Head of AR	None	Major finding – blocks release	Fixed
BR-REC-007	After-photos are required unless the work order is marked BFI; their absence is a major finding	CON	Head of AR	BFI flag set	Major finding – blocks release	Fixed
BR-REC-008	Deliverable photos follow the naming convention "B (n)" for before and "a (n)" for after; deviations are minor findings	CON	Head of AR	None	Minor finding	Fixed
BR-REC-009	The closeout number, when present, is exactly six digits; any other format is a minor finding	CON	Head of AR	Empty CO# is permitted – reviewer optional	Minor finding	Fixed

ID	Statement	Type	Owner	Exceptions	On violation	Configurable
BR-REC-010	Major findings block release; minor findings must be corrected or explicitly waived by a Senior AR or above, with the waiver recorded	CON	Head of AR	Senior AR+ waiver, recorded	Block(major) / Flag(minor)	Fixed
BR-REC-011	After release, a work order moves through the invoicing states ready → invoiced → paid	DEF	Head of AR	—	—	Fixed
BR-REC-012	An invoiced-unpaid work order is worked by collections until paid, with every follow-up recorded; aging counts from the invoice date	ACT	Head of AR	—	Flag	Per client

6.9 Dispatch & vendors — DSP

ID	Statement	Type	Owner	Exceptions	On violation	Configurable
BR-DSP-001	Technicians are external subcontractors; every dispatch names the vendor (company or individual) performing the visit	DEF	Operations (J. Brown)	—	—	Fixed
BR-DSP-002	The technician pool is shared company-wide; a dispatcher's book is a personal lens on the shared pool, never a private list	CON	Operations (J. Brown)	None	—	Fixed
BR-DSP-003	The fulfilment visit is offered first to the technician who performed the assessment	ACT	Operations (J. Brown)	Tech unavailable or unsuitable — reason recorded	Warn	Fixed

6.10 Integrations & data boundaries — INT

ID	Statement	Type	Owner	Exceptions	On violation	Configurable
BR-INT-001	The legacy ClickUp workspace is read-only from every system and every project, permanently; no writes under any circumstances	CON	Operations (J. Brown)	None. No exception may be granted.	Block; treat as an incident	Fixed
BR-INT-002	Outbound sync to a client system sends only curated client-visible content; the internal record is never mirrored	CON	Operations (J. Brown)	None	Block	Fixed
BR-INT-003	Work orders arrive from five intake sources: Corrigo, Ecotrak, ServiceChannel, email, and Seamgo	DEF	Operations (J. Brown)	—	—	Per client

Appendix A — The status pipeline (referenced by BR-WRK-002)

One pipeline, four groups, nine phases. The phase bar order is: Intake · Assessment · Quote · Approval · Scheduled · In Progress · Parts · Done · Invoiced.

Status	Group	Phase
Open	open	Intake
emergency	open	Intake

Status	Group	Phase
assessment scheduled	active	Assessment
assessment ongoing	active	Assessment
return trip needed	active	Assessment
waiting for quote	active	Quote
quote ready	active	Quote
!! waiting for advice	active	Approval
!! waiting for approval	active	Approval
approved	active	Approval
job scheduled	active	Scheduled
pm scheduled	active	Scheduled
job ongoing	active	In Progress
please order parts	active	Parts
waiting for parts	active	Parts
done/incurred	done	Done
!! ready to invoice	done	Done
<< invoiced not paid >>	active	Invoiced
!! canceled/postponed	closed	– (off-pipeline)
invoiced <i>(archive)</i>	done	Invoiced

7. Conflict register

#	Rules in conflict	Nature	Raised by	Owner	Resolution	Date
C1	BR-ACC-005 vs (unwritten) self-approval rule	An ATL who builds a quote could also approve it – no rule yet prevents self-approval	Drafting	Operations (J. Brown)	Open – see PRD-WRK-001 §19 Q4	2026-08-07

8. Change control

1. Anyone may **propose** a rule change. Only the named **owner** may approve it.
2. Changes affecting money, access, or client visibility require a second approver from Finance or Operations leadership respectively.
3. A changed rule gets a **new effective-from date**; the old version is retained with an effective-to date. **Never edit a rule in place.**
4. Every change is assessed for impact on existing work orders, in-flight approvals, historical reporting, and any PRD that references the rule.
5. Rules are re-reviewed annually by their owner, or on any client-contract change.

Change log

Date	Rule ID	Change	Proposed by	Approved by	Impact assessed
2026-08-07	All	Initial catalog v1.0 – 50 rules drawn from existing product documents and validated prototype behaviour	J. Brown / Claude (drafted)	Pending review	–
